GILANG NUR AKBAR

Bekasi Regency, West Java • 0896-1139-2077 • gnurakbar19@gmail.com • github.com/gilsid • gilangnurakbar.com

PROFILE SUMMARY

Information Technology undergraduate (semester 5) focused on modern web development with Next.js and Svelte. I use AI coding agents such as Claude Code, Opencode, T3Code, and Antigravity in my daily workflow to build and ship products faster. I am looking for an internship with a team that already builds software with AI-assisted development.

EDUCATION

Universitas Bina Sarana Informatika 2024 – 2028 (Expected)
Bachelor of Information Technology, Cikarang Campus *GPA: 3.93/4.00*

PROJECTS

Nutrilensia June 2026

- A mobile app for scanning nutrition labels through the camera, showing the nutritional analysis to users instantly as nutrient values, grades, and explanations. Scan results are saved to history, can be compared across products, and are summarized in weekly reports. Additional features include an educational quiz, a health risk monitor, and family mode.
- github.com/nutrilensia/Mobile-Ceklabel

Novira August 2026

- A CCTV-based city cleanliness monitoring dashboard. Turns 290 public CCTV streams in Bandung into an automatic litter monitoring system, with 0–100 priority scores, SLA timers, citizen reports, and cleanliness rankings per urban village (kelurahan).
- github.com/ikn-fti-nasional/novira

Undangan Digital July 2026

- A website for creating and managing digital wedding invitations. Each couple gets their own dashboard to manage invitation content, choose themes, manage guest lists, and track attendance confirmations. Includes a superadmin role that can deactivate or delete couple accounts.
- github.com/gilsid/undangan-digital

Perpustakaan Digital November 2025

- A website for managing a library digitally. Users can browse the book collection by category, borrow and return books, bookmark favorites, and leave ratings and reviews. The admin dashboard manages books, users, and categories, and monitors user activity.
- github.com/gilsid/Perpustakaan-Digital

PlantCare July 2026

- A plant care app so no schedule gets missed. Each plant can be recorded in detail with its photo, type, location, and notes. Supports custom schedules for watering, fertilizing, and more.
- github.com/gilsid/plantcare

SKILLS

Programming Languages: HTML, CSS, PHP, JavaScript, TypeScript, Dart

Frameworks: Next.js, SvelteKit, Flutter

Tools & Text Editors: Git, GitHub, Emacs

Databases: MySQL, PostgreSQL

ACHIEVEMENTS

- 1st place, Web & Mobile Application Showcase, 2026
- 2nd place, Web Development Competition, FTI Festival, 2026

CERTIFICATIONS

- Industry-Based Competency Test – Database Systems, 2026
- National Cyber Security Webinar, FTI Festival, 2026
- Software Engineer Seminar & Workshop, 2024
